3.5	Waste and recycling performance consistently good and improving across the county		D Gallagher/I Gregory WDC	Customer surveys carried out prior to Operations Partnership Award. Where possible, customer aspirations were built into service specifications.	All but one (trade waste) waste/recycling Scorecard targets met or exceeded. All outputs are continually monitored and discussed at monthly partnership meetings.	Good. New initiatives are underway to further increase domestic and trade waste recycling and divert residual waste from landfill. We also expect 100% of all schools to be recycling this year (currently 95%)	Currently WDC is ranked No1 in Norfolk and Suffolk for waste and recycling performance and 17th in UK. <b>Paul Patterson Principal Service Manager (Drainage &amp; Coast Protection)</b> WDC is an active partner in the development of Shoreline Management Plans the policies of which place high value on retaining the quality of the natural environment. Implementation of those policies is shared by several agencies. Policy implementation actions by WDC have little impact upon the rural undefended stretches of natural coast

In general the policies for established significant settlements are for long term defence however some smaller villages and hamlets [Covehithe and parts of Easton Bavents] are assessed as unsustainable. Measures for community adaption in responseto coastal change are under development by Defra. Management of sea flood risk is a significant issue for the Blyth estuary and Lowestoft Lake Lothing areas. The affordability of preferred policy delivery is a key issue for all parties involved inerosion and flood risk management.
3.11	High levels of second homes (absent owners) has impact on viability of local amenities such as post offices, shops and pubs
